

DISEASE

EXPOSED TO 2PACK PAINT

If exposed to two-pack paint spray, you can easily get Asthma. The side effects include persistent coughing, a runny nose and tightness of the chest.

- Spraying produces a lot of invisible mist. Never spray outside of the spray booth.
- Make sure you know the clearance time of your spray booth.
- Sprayers should not lift the visors of their masks immediately after spraying.
- Wait for the clearance time to pass.
