

SEMINAR - THE FUTURE OF ISO 45001

13TH NOVEMBER 2018

PARK INN BY RADISSON, MANCHESTER CITY CENTRE

ACT invite you to join a seminar to consider how this important international health and safety standard will shape and support how health and safety is managed.

The seminar will provide you with expert knowledge and guidance to help you understand the new ISO 45001 standard and provide insight into the critical aspects facing those transitioning from OHSAS 18001 to ISO 45001. It will also explore the opportunities for integration of ISO 45001 with other management systems, like ISO 9001:2015 and ISO 14001:2015, and explain how this might be achieved.

We are pleased to announce that David Smith, chair of the ISO Committee responsible for the development of ISO 45001 and the BSI Committee for management systems experts, is one of our principal speakers. He will be joined by health and safety practitioners involved in the development of the standard and others with views on how it should be applied.

They and other health and safety and legal specialists will provide valuable perspectives on:

- **its value to your organisation,**
- **how the standard should be applied,**
- **implementation of the standard (challenges and opportunities),**
- **its context in relation to legal compliance, and**
- **implications of leadership and worker engagement requirements.**

David Smith is the chairman of the ISO Committee responsible for the development of ISO 45001 and was involved in the development of BS OHSAS 18001. Additionally, he represents the United Kingdom on a wide variety of ISO and European committees on management systems standards and has many years' experience developing, writing, and implementing management systems.

The final version of the ISO 45001 standard was made available in March 2018. This seminar provides an opportunity to evaluate the likely impacts of this.

Seminar Date: Thursday 13th November 2018

Location: Park Inn by Radisson, Manchester city centre M4 4EW

Delegate rates:

- Full price - £259
- Tables of 6 delegates can be booked for - £1,399

- emma.griffiths@actassociates.co.uk
- +44 (0) 1384 447915

For details of the seminar programme see overleaf

PROGRAMME

09.30 Registration, refreshments and networking

10.00 **Welcome and introduction - Ian Coombes Managing Director ACT and Seminar Chair Peter Hall, past president IIRSM**

10.10 Understanding ISO 45001 - David Smith, Chair of ISO 45001 development committee

The session will consider the significance and role of the ISO standard, the benefits and opportunities it brings, the structure and themes of the standard (including definitions/terms, context of the organisation, leadership and worker engagement), ownership of the system, system integration (Annex SL) and migration from BS 18001, continual improvement.

11.10 Questions and Answers

11.25 Comfort break – Refreshments and networking

11.40 The challenges of transition to a business - Todd Hallam, EHS Director, Chalcraft Construction

After implementing ISO 9001, ISO 14001 and OHSAS 18001 Chalcraft are committed to migration, with ISO 9001 and 14001 migrated in 2017. Considering the challenges/benefits of implementing standards into the organisation, including ISO 45001. *Concluded with Questions and Answers*

12.15 Leadership requirements and legal compliance - Chris Green, Partner, Weightmans LLP

A perspective on how the leadership requirements of ISO 45001 and management system conformity with the standard relate to legal compliance requirements, including corporate manslaughter and sentencing guidelines. *Concluded with Questions and Answers*

12.40 Lunch and networking

13.30 Case study - Implementation in a large corporate construction organisation – Tony Leach, Engie UK BU Director of Safety

Benefits and limitations, context of the organisation, multiple operations – applicability and consistency, leadership, culture, worker engagement, systems integration, effect on supply chain, continual improvement. *Concluded with Questions and Answers*

14.30 A health and safety specialist's perspective – Andrew Foster, UK representative on ISO 45001 development committee

A perspective on the practical issues that ISO 45001 will require and need to be right. Including the importance of worker consultation and participation, making this effective, and conformity with legal requirements and other requirements. How conformity with the ISO 45001 standard could help with legal compliance. *Concluded with Questions and Answers*

15.00 A professional perspective on significant clauses.

A number of the clauses in ISO 45001 are likely to have an impact on how organisations manage health and safety. This session will focus on clauses related to competence, awareness and incident investigation. *Concluded with Questions and Answers*

15.30 Conclusions drawn by David Smith, Chair of ISO 45001 development committee - valuable insights from the day

15.40 Summary and thanks by Seminar Chair Peter Hall, past president IIRSM

15.45 Close – Refreshments and networking
