Construction Health Inspection Initiative

Alastair Mitchell, HSE

HSE plan for construction – our priorities

- Supporting small businesses to achieve improved risk management and control
- Reducing incidents of ill health, with a particular focus on occupational lung disease and musculoskeletal disorders
- Embedding the principles of CDM 2015 with all duty holders
- Set out in the Sector plan for Construction

Covid-19 spot checks in construction:

- Since start of pandemic CD have carried out 4089 spot checks (3543 as site visits)
 53% of visits no further action required appropriate,
- measures in place
 47% of visits some form of action required from
- 47% of visits some form of action required from verbal advice to enforcement notices
- Overall approach has been to secure control by working collaboratively with duty holders
- 101 enforcement notices issued most common defects relate to inadequate cleaning regimes, social distancing, and/or management arrangements

Silica - key non-compliance themes:

- Most related to cut-off saw or angle grinder on bricks, blocks, concrete, roof tiles, flags etc.
- Tool used with water suppression missing / inadequate
- RPE: none provided, the wrong type and / or lack of face fitting
- Others related to breaking, chasing and dry sweeping

Building Safety Regulator - Update

Alastair Mitchell, HSE

Extracts

Building Safety Regulator

Alastair Mitchell - HM Inspector of Health and Safety, Construction Sector, HSE.

What can you do to prepare?

Existing buildings

- Think now about your fire and structural risks and how to manage them
- Are those working in safety critical roles competent, do they have the right skills, knowledge, experience and behaviours required?
- Collect the information you need to demonstrate your approach to the management and control of risk
- Consider performance measures so you know how you're doing
- · Review your resident engagement strategy

BSR objectives

- The Building Safety Regulator will ensure buildings are safe so tragedies like that at Grenfell Tower do not happen again
- Provide independent, risk-based assurance of the design, construction and occupation of higher risk buildings
- Re-establish confidence in the system so that residents are safe - and feel safe - in their homes.

Elimination to avoid the hazard completely e.g. stopping the activity

Substitution i.e. replacing with something less hazardous or easier to control

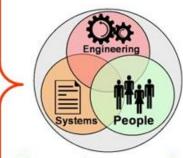

Engineering solutions to isolate, separate, reduce or control exposure to hazards

System solutions e.g. 'safe procedures' so that circumstances which arise can be dealt with in a correct & safe way i.e. people know what to do.

People / behavioural solutions (incl PPE) so that hazards & risks are known & correct / safe behaviour is the norm i.e. "the way we do things round here"

The most common & usually in combination

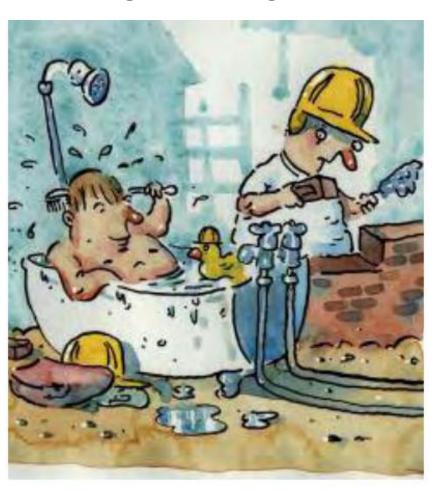

Washing / Washing Facilities

"...are there wash basins, hot and cold (or warm) running water, soap and towels?"

Keep your COVID-19 risk assessment up to date

Every workplace should have a COVID-19 risk assessment that is regularly reviewed as circumstances change.

For everything you need to consider and the actions you should take to control the risks and prevent the spread of the virus, watch this short video.

Advice and an example assessment are <u>available at our COVID risk page</u>.

Updated advice on talking with your workers about preventing coronavirus

The law says you must consult with your workers about reducing risks from coronavirus in your workplace.

HSE has updated its guidance to help you have conversations with your workforce about providing support and keeping control measures in place.

Talking to your workers means you can explain changes you're making to keep the workplace COVID-secure and continue to run your business safely. It also gives workers the chance to:

- tell you if they're worried about any workplace risks
- influence decisions about health and safety

HSE has converted this advice to web pages so it is easier for people to find the information they need and we have expanded the guidance to include more advice on:

- supporting higher-risk groups
- returning to the workplace
- · ventilation and air conditioning
- · stress, mental health and wellbeing

<u>The updated guidance</u> will help you keep in touch with workers and support them as restrictions are eased in the coming months.

COVID-19 guidance and updates

HSE continues to publish the latest coronavirus-related guidance and information, as well as updating previously published content.

For a full range of COVID-related information and advice visit our <u>coronavirus pages</u>. This includes:

- Ventilation and air conditioning
 Adequate ventilation (including air conditioning) can help reduce risk of spreading coronavirus
- <u>Protecting home workers</u>
 Advice on lone working without supervision, display screen equipment and stress
- Hand sanitiser and surface disinfectants
 Guidance for employers who are providing hand sanitiser for their workers and others to use in their workplaces

Webinar on COVID-19: Science and evidence

Join HSE's Chief Scientific Adviser for a free webinar on COVID-19 environmental transmission and modelling.

Along with his SAGE-EMG co-chairs, Professor Catherine Noakes OBE and Professor Harry Rutter, Professor Andrew Curran (pictured) will lead the discussion on how science is helping to improve understanding of the risks of transmission in workplaces and other settings.

Book your free place for the webinar on Tuesday 16 March 2021 at 12pm-1.30pm.

For further information on HSE's scientific evidence and research on COVID-19, visit our <u>coronavirus webpage</u>.

BHSEA Secretary – Vacancy

After being in post for over nine years the current Secretary Liz Prophett is looking to start winding down during the current year, possibly running into 2022.

We are therefore seeking to recruit a new person into the role ASAP with something like a three month lead in.

The Role: To provide the Association with a self-employed contract service. Fulfilling the various tasks, including the key ones listed below, will require an average of 20 – 30 hours / week, with opportunity for great flexibility rather than fixed hours. A generous rate (circa twice the Minimum Hourly Rate) is paid together with a working from home allowance; laptop computer, mobile phone, and other equipment as may be necessary, will be provided.

Key Tasks are to:

- Administer the day-to-day running of the Association, liaising with the Chair / trustees as necessary.
- Support Council, Management and Honorary Officers (Trustees) in achieving the Association's charitable aims.
- Produce BHSEA Annual Programme of Events and help compile a list of Construction / WWT events.
- Develop/organise/arrange BHSEA events including virtual events, liaising with speakers and event venue staff.
- Produce a monthly Newsletter and issue electronically.
- Administer BHSEA website including Membership database and subscriptions.
- Organise Council, Management & Construction Committee meetings prepare agendas, take minutes, etc.
- Manage and monitor BHSEA and Construction/WWT bank current accounts income and expenditure.
- Liaise with BHSEA accountants in the administration of BHSEA finances.
- Promote the further development and simplification of policies, procedures and guidance.
- Gather information and assist in producing BHSEA Annual Report & Accounts.
